

FOOTHILL – CITRUS BASEBALL UMPIRES ASSOCIATION

MEMBER CERTIFICATION OF NON-RESTRICTION

Foothill-Citrus Baseball Umpires Association is an association formed to educate and administrate baseball umpires for High Schools that are members of the California Interscholastic Federation Southern Section. This association is a member of the California Baseball Umpires Association.

There is great public concern over sexual predators and the controversy surrounding Megan’s Law which involved a seven year old girl living in New Jersey, Megan Kanka, who was raped and killed by a known child molester. A federal enactment was followed by California Megan’s Law initiated in 1996.

California penal Code 290 et. Seq. requires certain individuals to register as sex offenders. The categories are quite broad and include individuals that have completed their sentences and probationary periods and have been released. The requirement is, at this time, for “LIFE.” The registration requirements are intended to permit public assess, if someone desires, to identify registrants, and their living proximity. Harassment of a registrant constitutes a crime. The law does not require a registrant to disclose his status.

Execution of this Member Certification of Non-Restriction expressly means that the individual is not restricted from participation on a High School campus with minors by any condition of probation, sentence, parole, and any other written express probation against officiating a sporting event where minors are participating. There is no requirement of any affirmative disclosure other than the affirmance that no restriction of probation in officiating high school exists.

This Association by requiring each member to read and affirm in writing that his officiating is not in violation of any formal written prohibition and in collecting and keeping said statements of records fulfills its implied duty to take steps to guarantee the safety of the high school students while not violating the individual’s right of privacy or double jeopardy.
